URAZ AKGÜL

I am seeking a position that will allow me to utilize both my frontend and backend skills to their fullest potential.

I have been proficiently coding with R and Python for over a decade, working on projects of various sizes and scopes. Combining my passion for programming with my professional business pursuits has been a goal of mine for several years now, and I am eager to find ways to merge these two areas. I frequently share my knowledge and projects on social media to stay connected with the programming community. If you're interested in learning more about my skills and background, please don't hesitate to reach out.

SKILLS

I am a Full-stack Developer skilled in HTML, CSS, and JavaScript. I keep up with new technologies and strive to improve my skills. My focus is on mastering React.js for building user interfaces. I have experience in front-end development and a foundation in back-end technologies like SQL, Python, and R. I've created data pipelines and used APIs to consume and integrate data into web applications. I'm comfortable using Git for version control and sharing my projects on GitHub to showcase my coding skills.
